OPTIONAL ENERGY EFFICIENT INSULATION

CFC free Polystyrene insulation with a rigid vinyl back skin, R factor of 6.25. Laminated PVC backing is available as a factory installed option. Calculated door section R-Values are in accordance with DASMA TDS-163.

EXCLUSIVE RITS™ DESIGN

Exclusive RITS™ “Reinforced Integral Truss System” design, for increased section strength and wind-load capabilities that include tongue and groove weather resistant meeting rails.

I-BEAM CENTER STILES

I-beam center stiles are engineered to reinforce the construction of the section and designed to eliminate the use of plastic reinforcement angles when the section is insulated.

REINFORCED ALUMINUM BOTTOM EXTRUSION

Heavy duty grooved “U” type weather seal is set into an aluminum reinforced “L” angle, and mechanically and chemically attached to the bottom section.

FLUSH PANEL DESIGN DISCLAIMER

1st United Door Technologies disclaims any quality issue related to aesthetic edge wave on pan door product and customers are required to communicate and acknowledge this as no returns will be allowed for this sole reason. Oil Canning can be defined as visible waviness in the flat areas of metal garage door and is referred to as elastic buckling (more commonly known as “stress wrinkling”). The degree of waviness can be difficult to measure, but may be apparent, especially under specific lighting conditions.
