The Rebirth of a Classic

26 gauge

24 gauge

Resurrection Series

Introducing the Apache and Rawhide Series. A distinctive design in steel sectional garage doors. The exterior of the door is embossed with a woodgrain texture finish accented by a vintage raised panel design. The Apache and Rawhide are quality constructed 2-inch thick uninsulated steel sectional garage doors offering exceptional value without sacrificing beauty or durability.

Specifications: Sections are 2-inches thick and manufactured from hot-dipped galvanized steel. Sections are pre-painted embossed with a woodgrain texture, RITS™ reinforced integral truss system AND optional window designs. Tongue and groove-meeting rails are roll formed into the panel. Vertical stile members are 19 gauge hot-dipped galvanized I-beams. Galvanized stiles are riveted and bonded to the interior face of the door with an silicon-based cement. Bottom sections are reinforced with aluminum "L" angle and bonded to the section for supporting a replaceable UV protected bottom weather seal. Insulation optional.

Exclusive RITS™ "Reinforced Integral Truss System" design for increased section strength that include tongue and groove weather resistant meeting rails. Optional CFC free Polystyrene insulation with a rigid vinyl back skin, R factor of 6.25. Laminated PVC backing is available as a factory installed option.

- 26 gauge
- Short panel only
- 21" high sections
- Galvanized stiles
- Shadow groove
- White only
- H1 or H2 Hardware pack
- 24 gauge

- H2 or H3 Hardware pack

* Available for Rawhide Series only. Check with your local Dealer for price and availability.

Reinforced Aluminum Bottom Extrusion

Heavy duty grooved "U" type weather seal is set into an aluminum reinforced "L" angle and bonded to the bottom section.

I-Beam Center Stiles

Galvanized I-beam center stiles are engineered to reinforce the construction of the section and eliminate using plastic reinforcement angles when the section is post insulated.
